My name is Tarek.I do well in school, and people think I am smart because of it. But it's not true. In fact, three years ago, I had some hard time in school. I used to watch video games and wasted most of my time playing and chatting with my friends. However, I decided to get serious about school and made a few changes. First, I decided I would become interested in whatever I learn. Then I started to work hard every day and never forgot any of my school work. I said to myself I would never, never be a loser. Finally, I made school more important than my friends and fun. After making these changes, I became an active student in classroom discussions. Then my test scores began to be higher. I still remember the first time that someone tried to bully me because "I was smart." How exciting! It seems to me that being smart is simply a matter of working hard and being interested. After all I knew that playing a new video game is hard work, but it doesn't help you get successful or get a good job.
